PROJECT DOCCINE

THEME :- Health/Fitness

What is Doccine ?

Project Doccine is a health related website having the most important feature of making an emergency appointment call to the nearest and best Hospital and Doctor and the best route of hospital using Machine Learning.

Other features are

- Online medicines and lifestyle accessories.
- Medicines at lower rates than retailers in the market.
- Listing best doctors with their consultancy fees with discounts.
- Making a single click ambulance booking.

How Doccine works ?

It will be available as Website and Mobile App (Both android and ios) User will just have to Log into the App or Website and start using it. Its Machine Learning UI will make use of this website easy to every age group of person.

Doccine Technology Stack ?

User Interface - HTML5, CSS3, Bootstrap, Reactjs

User Statistics Collection and Visualization – Python , Django , REST APIs, NGINX

Some Statistics

PROJECT DOCCINE

There is less number of competitors for this emergency feature app and with all above mentioned features.

Practo will be our only competitor.
